Subject: RE: Notification - Air Quality Permits (Invenergy NSR/PSD)

Hi Tim,

The public comment period ends 6/8. The permits branch internal deadline to contact ACHD to discuss any comments drafted is one week prior, 6/1. I'll likely have my review done before then and will be in contact as things develop

Unless you have a modeling contact you usually correspond with I would suggest reaching out to the permit writer, Bernadette Lipari (Bernadette.Lipari@AlleghenyCounty.US).

It looks that Appendix C—Air Quality Modeling Analysis is part of the Review Memo posted online, starting on pg. 44. The review memo also references Section 6 of the application as relevant to modeling and a separate document "Modeling Review of Invenergy LLC (Invenergy) Proposed Natural Gas Combined-Cycle Power Plant Installation Permit". These two documents, and the modeling files themselves, do not appear to be posted.\

Thanks for your help on this!

Sure. I'll just need to track down the modeling components. There should be a report along with electronic files. I went to ACHD's website and not all of the appendices are posted (or I just can't find them).

Should I start with the document administrator on the first email? What type of time frame are we working on; when do any comments have to be finished by?

This seems to be a pretty small plant and I do think ACHD's has reached out to me a couple of times as they put this application together. If I'm remembering this correctly, the only minor complicating factor may be that the plant is located along the border of Allegheny County. That may complicate some things since the plant is in a PM-2.5 NAA but it's impacts may extend into neighboring counties that are attainment for that pollutants. Not sure if anyone has run across this possibility and how to handle it.

Hi Alice,

ACHD has a PSD permit (and associated modeling) out to public comment. Is there someone from your office that Riley can work with to review the modeling portion of this project?

Thanks,
Mary Cate

Hi MC,

ACHD has begun public notice of the Invenergy NSR/PSD permit, with public comment ending June 8, 2021. They provided a link to permit files on their external webpage, but the modeling files do not appear to be posted here. AQAB may need to reach out to their counterparts for those.
